

# Drawing I Supply List

## Graphite Pencil: Recommend: 2H, H, HB, 2B, 4B, 6B

### Graphite Grades

Graphite is produced in various grades or degrees according to the softness or hardness of the material. Different grades produce different types of marks. The grade of the pencil is usually designated on the side or the end of the pencil. For drawing pencils, this designation is an alphanumeric value.

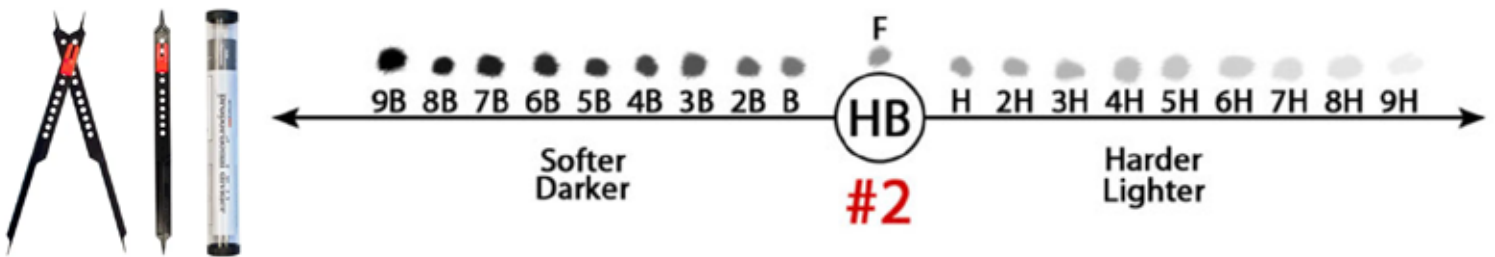

### Alphanumeric designation

Grades of drawing pencils are organized in a scale based on softness or hardness. An "HB" pencil is found directly in the center of the scale.
